

JSON API v2.0

Data fetch routines and definitions

Eliminate the fog with Total Network Visibility®

Contents

API Definition	3
Function Summary.....	3
Function Details by Web Page	8

API Definition

This RESTful API is provided to permit external data processing of TotalView data both in pre-processed as well as post-processed results.

Data can be queried directly from a TotalView server by referencing the server's IP or DNS name, port number, and the API call. For example:

<http://servername:port/api/NetStat.json>

All fetches are relative, so they should work if the server is located behind a URL proxy.

The resulting information uses standards based JSON format (<https://www.json.org/>) for all queries to be compatible with a wide variety of browsers and query tools.

Function Summary

NetStat.json	General data on the state of the network, list of pages and footer.
DashboardHealth.json	Health percentage of the network
DashboardManufacturers.json	Listing of network equipment manufacturers on the network
DashboardSpeed.json	Interface speeds seen on the network
DashboardDuplex.json	Interface duplex count seen on the network
DashboardHED.json	Overall errors seen on the network
DashboardHUD.json	Overall utilization seen on the network
DashboardHID.json	Overall issues seen on the network
DashboardHPD.json	Overall port usage on the network
DashboardDevicesList.json?t=cpu	List devices that have CPU graphs that can be displayed
DashboardCPU.json?d=10	List device 10 CPU utilization
DashboardDevicesList.json?t=ram	List devices that have RAM graphs that can be displayed
DashboardRAM.json?d=10	List device 10 free RAM

DashboardDevicesList.json?t=mos	List devices that have MOS graphs that can be displayed
DashboardMOS.json?d=10	List device 10 MOS score
DashboardDevicesList.json?t=intUtil	List devices
DashboardInterfacesList.json?d=10	List interfaces for device 10
DashboardIntUtil.json?d=10&i=1	Show utilization for device 10, interface 1
NLT.json?q=is%20the%20internet%20up%3F	Query the NLT processor with a question
Devices.json	List the devices currently being monitored
Devices.json?d=10	List device and interface listing information for device 10
DevicesGraphData.json?d=10	Display current graph data for device 10
DevicesGraphData.json?d=10&t=h	Display historic graph data for device 10
Devices.json?d=10&i=5	Display device and interface information for device 10 interface 5
DevicesGraphData.json?d=10&i=5	Display current graph data for device 10 interface 5
DevicesGraphData.json?d=10&i=5&t=h	Display historic graph data for device 10 interface 5
Path.json	Show path updated date and time
PathMap.json?t=fh&ipa=10.0.0.40&ipb=10.30.0.12	Show the forward path map between 10.0.0.40 and 10.30.0.12
PathGraphData.json?I11-2RE D11-U Q11-18-12038081	Show path graph data for specified interfaces
Map.json	Map name information
MapConfig.json?tab=0	Map configuration for map 0
MapCurrent.json?tab=0	Map utilization information for map 0
diagramLayer3.json	Layer-3 information for network diagram
Gremlins.json	Show all groups, last poll information

Gremlins.json?GroupName=Austin	Show last poll information from group "Austin"
Gremlins.json?timeslot=3&GroupName=Austin	Show 3 polls ago from group "Austin"
favorites.json	Show interfaces listed on the Favorites tab
DevicesCurrent.json?d=10&i=3	Show current utilization of device 10, interface 3
Issues.json	Show current issues
Issues.json?GroupName=Austin	Show current issues in the "Austin" group
Netflow.json	Show interfaces configured for Netflow
NetflowGraphData.json?I23-11 I23-10 I0-61 I0-60 I2-21	Show all interface graph data for Netflow graphs
NetflowFlows.json?d=0&i=6&f=tx&t=1530895312	Show flows for device 0, interface 6, transmitted data for timeslot 1530895312
Top10Error.json	Top 10 interfaces with errors
Top10Error.json?GroupName=Austin&scope=peak+daily	Top 10 interfaces with errors in the "Austin" group, peak daily
Top10TxPct.json	Top 10 transmitters
Top10RxPct.json	Top 10 receivers
Top10Latency.json	Top 10 latency
Top10Jitter.json	Top 10 jitter
Top10Loss.json	Top 10 loss
WAN.json	WAN interface information
WanGraphData.json?I1-61 I1-60 I45-61 I45-60	WAN graph information
InterfacesHalfDuplex.json	Half duplex interfaces
InterfacesTrunks.json	Trunk ports
InterfacesUnknownProto.json	Interfaces with unknown protocols

InterfacesSub10Meg.json	Interfaces slower than 10meg
Interfaces10Meg.json	10Meg interfaces
Interfaces100Meg.json	100Meg interfaces
Interfaces1Gig.json	1Gig interfaces
Interfaces10Gig.json	10Gig interfaces
Interfaces100Gig.json	100Gig interfaces
InterfacesAbove100Gig.json	Interfaces faster than 100Gig
Interfaces10Meg.json	10Meg interfaces
InterfacesOperDown.json	Operationally down interfaces
InterfacesAdminDown.json	Administratively down interfaces
sdwan.json	SD-WAN interfaces
sdwangraphdata.json?C0-P C0-L C1-P C1-L	SD-WAN graph data
Tools.json	Tools page update status
ToolsIPtoMAC.json?q=10.0.0.40	ARP lookup of IP address 10.0.0.40
ToolsMACToInt.json?q=64-00-6A-94-A0-24	MAC interface lookup of 64-00-6A-94-A0-24
ToolsMACtoIP.json?q=64-00-6A-94-A0-24	MAC to IP lookup of 64-00-6A-94-A0-24
ToolsSubnets.json	List all subnets and devices on them
ToolsVLAN.json	List all VLANs assigned to devices
Phones.json	List all phones
MOS.json	List all devices on MOS tab
MOSGraphData.json?D0-M D1-M D2-M D3-M	Show MOS graph data
qos.json	List all interfaces with QoS

qosgraphdata.json?l11-1TR l48-1TR l50-1TR	List QoS utilization graphs
siptrunks.json	List SIP trunks configured to be monitored
siptrunksgraphdata.json?C0-P C0-L	List SIP trunk data
VoIPTools.json	VoIP Tools update status
VoIPToolsWhereConn.json?q=10.0.0.40	VoIP where is 10.0.0.40 connected
update.json	Update network bridge/ARP/routing table information
cloud.json	List cloud monitored services
CloudGraphData.json?C0-P C0-L	Show graphs for cloud monitored services
Internet.json	Show Internet connectivity stats
PredictorsCabling.json	Show cabling predictors
PredictorsBandwidth.json	Show bandwidth predictors
DevicesDNSLookup.json?ip=10.10.0.10	Reverse-DNS lookup of 10.10.0.10

?

Query parameters

Name	Type	Description
t	string	

Response properties

- array<object>
 - dev: number
 - title: string

Response examples

- *Query string: t=health*

```
[  
 {  
   "dev": 0,  
   "title": "hqpa500"  
 },  
 {  
   "dev": 1,  
   "title": "hqfw1"  
 },  
 "..."  
 ]
```

/DashboardHealth.json

Dashboard's network health widget data

Response properties

- object
 - GOOD: boolean
 - HEALTHRATIO: number
 - STATUS: string

Response examples

- *Query string: (empty)*

```
{  
 "GOOD": false,  
 "HEALTHRATIO": 1.09689211845398,
```

```
"STATUS": "DEGRADED (1.1%)"  
}
```

/DashboardDuplex.json

Dashboard's interface duplex widget data

Response properties

- object
 - PIEDATA: array<object>
 - COUNT: number
 - ID: string
 - TITLE: string

Response examples

- *Query string: (empty)*

```
{  
  "PIEDATA": [  
    {  
      "COUNT": 158,  
      "ID": "full",  
      "TITLE": "Full Duplex"
